

The new
charging
modules

USB-A&C and USB-C

A new way to charge: The new USB-A&C and USB-C charging modules from BACHMANN provide the ideal solution for any application. With the innovative charging technology any electronic device can be charged quickly and safely without an external power supply unit. Thanks to the integrated USB Power Delivery (PD) and Qualcomm® Quick Charge™(QC), fast charging is just one of the many benefits.

The USB-A&C 22 W combi-module is the ideal solution for small and medium sized devices, such as common smartphones and tablets. The USB-C 30 W module can be used to charge medium sized devices and small notebooks. With help from the USB-C 60 W module, a wide range of common electrical devices and high-powered notebooks are also covered.

BENEFITS

- **Latest USB-C charging technology**
- **Fast charging via PD and QC**
